CPS Easy Stop-160-Vision

The CPS Easy Stop-160-Vision is a, patented, sheet stop for the stacker of a flatbed diecutter Bobst SPO 160 Vision.

It prevents the „jump“ of the sheets behind the machine guides and makes it possible to use the machine rear support.

It is introduced into the machine from outside and can be moved without problems with the manually side strokes of the machine.

The parts can be obtained by CPS under part No. 19
